CATALOGUE OF

the R.P.V. BRETTELL COLLECTION of

## **COINS OF EXETER**

and Civil War Issues of Devon

DAY OF SALE

**WEDNESDAY, 28th OCTOBER 1970**

*commencing at 10.30 a.m. precisely*

---

**ON VIEW Monday and Tuesday prior to Sale**  
**9.30 a.m. to 12 noon and 1 p.m. to 4.30 p.m.**

## CONDITIONS OF SALE

---

- FIRST.—The highest bidder to be the buyer; and if any dispute arise between two or more bidders, the lot so in dispute shall be immediately put up again and re-sold, provided the Auctioneer cannot decide the said dispute.
- SECOND.—No person to advance less than 1s.; above five pounds, 5s.; and so on in proportion.
- THIRD.—All lots are put up for sale subject (a) to any reserve price imposed by the seller and (b) to the right of the seller to bid either personally or else by any one person who may be the Auctioneer.
- FOURTH.—The purchasers to give in their names and place of abode, and to pay down 5s. in the pound or more in part payment, or the whole of the purchase-money, *if required*; in default of which the lot or lots so purchased to be immediately put up again and re-sold.
- FIFTH.—Each lot is believed to be genuine, but should any lot prove to be a forgery, or reprint, or wrongly described in the catalogue, the purchaser is at liberty to take or reject it, provided always that notice of such rejection be made and the lot returned within seven days from date of sale.
- SIXTH.—The Auctioneers will not hold themselves responsible for any action that may arise, acting solely as agents between buyer and seller and for both equitably.
- SEVENTH.—The Auctioneers will not hold themselves responsible for the safe custody of any lots left more than three days after the sale.
- EIGHTH.—Buyers must satisfy themselves as to the accuracy of their purchases at the time of delivery. The Auctioneers not to be held responsible for any discrepancy which might be discovered after the lots have been removed from their premises.
- 

### Please Note.

The metal in which the coins are struck is indicated thus:—

*A*=gold, *Æ*=silver, *Æ*=copper or bronze.

*El*=Electrum (an alloy of gold and silver).

*Bl*=Billon (an alloy of silver and copper).

Care is taken to describe accurately the condition of coins and medals, using the following scale: *Extremely fine*, *Very fine*, *Fine*, and *Good*. Where no condition is stated it may be assumed that the coins and medals are not in good condition.

## FOREWORD

THIS catalogue lists for sale coins of Exeter and other Devon issues of the Civil War. It is probably the most comprehensive collection of coins of Exeter ever got together, more especially in the Anglo-Saxon and Norman series. Mr. Brettell has collected since he was a boy, but it was only immediately before the war that he began to specialise in issues of the Devon mints.

The format of the catalogue is based on that of the Sylloge series, yet giving details, such as condition and rarity, necessary to an auction catalogue. Every coin is illustrated and so offered for sale separately. Information given includes the moneyer's name (as a sub-heading between lots), type, mint reading, die axis (usually to the nearest 90° unless it very obviously lies between) and references to similar or comparable pieces (only to the end of the Tealby issue of Henry II). References are usually to Hildebrand (H) or British Museum Catalogue (BMC), but on occasion to the Copenhagen (C), Fitzwilliam (F) and Stockholm (S) Sylloges. The figure in brackets given with the Paxs type of William I denotes the heraldic quarter of the reverse in which PAXS begins.

Wherever possible, provenances have been given. Auction sales, most of which need no explanation, are followed by the relative lot number in brackets. By far the most frequent source quoted is "Simpson", Mr. Brettell having, in 1955, purchased the collection of the late Stephen Simpson, of Spitchwick Manor, Poundsgate, near Newton Abbot. Unfortunately, Mr. Simpson does not appear to have noted the provenances of his coins, but it is very obvious that many of the rarer pieces are those that had been recorded but had since been untraced. Other sources include the collections of the Duke of Argyll and W. R. Hooper, of Torrington (both purchased by Spink and Son, Ltd.), S. R. Naish and Raymond Carlyon-Britton (both purchased by B. A. Seaby, Ltd.) and W. C. Wells (purchased by the cataloguers). The A. F. V. Radford collection was sold at Sotheby's 12th June, 1944; listed in the same catalogue were Roman Coins "the property of the late E. Heron-Allen, F.R.S.", the provenance suggested for Brettell No. 245. Two coins, Brettell Nos. 297 and 314, were part of a small parcel of 16 coins (14 of Henry I, type XV, and 2 Tealbies) purchased from, and perhaps found in, the Bedford area. Mr. Brettell's tickets, and those of former owners, are offered with the coins.

As he had recently given some thought to the activities of moneyers of the South-Western mints, Mr. Ian Stewart kindly offered to write an introduction to the catalogue. In the very short time available he has produced a detailed article, containing most useful tables for easy reference, and at the same time put forward facts and ideas which can only stimulate interest and further study. Thanks are also due to Mr. Frank Purvey, who photographed the coins for the plates, and the Department of Coins and Medals for making facilities available for Mr. Simon Bendall to weigh the coins.

PETER MITCHELL,

A. H. BALDWIN & SONS, LTD.

GLENDINING & CO.

# AN IMPORTANT REMINDER

## for Overseas Collectors

### on the advantages of selling at GLENDINING & CO.

1. Our commission for selling is only 12½% (exclusive of illustrations) and no other tax is payable.
2. There are NO RESTRICTIONS OR CUSTOMS DUTY on the import of collectors' coins.
3. Payment can be made IN ANY CURRENCY of the vendor's choice.
4. Buyers are NOT required to pay any form of auction tax.
5. Our extensive subscription list ensures that Sale Catalogues reach IMPORTANT BUYERS THROUGHOUT THE WORLD.
6. Enquiries for the disposal of collections will receive IMMEDIATE EXPERT ADVICE, and arrangements made to view if necessary.
7. Complete settlement made 21 DAYS AFTER THE DATE OF SALE.
8. CASH ADVANCES, at our discretion, if required.

#### Avis important aux collectionneurs étrangers concernant les avantages de la vente chez Glendining & Co.

1. Notre commission ne s'élève qu'à 12.5% du prix de vente; aucun impôt ni aucune taxe sont dus. Les frais d'illustration sont en supplément.
2. Il n'y a ni taxe douanière ni restrictions frappant l'importation de monnaies de collections en Angleterre.
3. Le paiement s'effectue en n'importe quelle monnaie au choix du vendeur.
4. Les acheteurs ne payent aucune taxe de vente.
5. Le réseau étendu de nos abonnés aux catalogues de vente assure une distribution touchant les acheteurs importants du monde entier.
6. Les demandes d'informations concernant la vente de collections auront notre attention immédiate et le cas échéant une expertise peut se faire.
7. Le paiement intégral s'effectue 21 jours après la vente.
8. Sur demande une avance en espèces peut éventuellement être accordée.

#### Wichtige Mitteilung für ausländische Sammler. Vorteile des Verkaufes durch Glendining & Co.

1. Unsere Kommission beträgt nur 12½% des Verkaufspreises. Steuern werden nicht erhoben. Abbildungskosten werden extra berechnet.
2. Sammlermünzen sind zollfrei und können anstandslos in England eingeführt werden.
3. Auszahlungen können in jeder beliebigen Währung nach Wunsch des Verkäufers gemacht werden.
4. Der Käufer zahlt keinerlei Auktionssteuern.
5. Unsere weitverbreitete Kundenliste bietet dafür Gewähr, dass unsere Verkaufskataloge alle bedeutenden Käufer der Welt erreichen.
6. In Bezug auf Verkäufe von Sammlungen erteilen wir unverzüglich fachmännischen Rat und besichtigen sie gegebenenfalls nach Ubereinkunft.
7. Auszahlung des Verkaufserlöses erfolgt 21 Tage nach der Auktion.
8. Ein Vorschuss auf den Verkaufserlös kann gegebenenfalls zu unseren Bedingungen geleistet werden.

NOTE.—We shall be pleased to execute commissions to purchase Lots, free of charge, for Clients unable to attend the Sale personally. Lots will be purchased in the nom-de-plume of "GRAHAM" and will be secured as much below limits as possible.

# THE EXETER MINT AND ITS MONEYERS

by IAN STEWART

EXETER has a long history. It was the centre of the British tribe of the Dumnonii, and known to the Romans as Isca Dumnoniorum. Like Ex-bridge, Exminster and Exmouth, it takes its name from the river Exe on which it stands. Its strategic position ensured a stormy history. It was seized by the Danes, blockaded by Alfred, recaptured from the Britons by Athelstan, destroyed by Swein of Denmark, besieged by the Conqueror, held for a time both for Matilda against Stephen and for Charles against Cromwell, and visited by William of Orange in 1688 on his march to London. A borough from the tenth century or earlier, it became the seat of Bishop Leofric in 1050 when the see of Devon and Cornwall was transferred from Crediton.

Coins were minted at Exeter from the end of the ninth century to the end of the seventeenth, though far from regularly or continuously during that time. Little is known of its activity from Alfred to Edgar because the coins of the time rarely bore a mint name. But for the next two and a half centuries money was coined regularly at Exeter. During the reigns of Ethelred II and Cnut it was one of the larger mints in the country. From Henry II's time Exeter took part in a number of recoinages—1180, 1205, 1248, 1300 and 1695—being the most significant place in the far West Country for the purpose of withdrawing old currency and producing new. It was also an active mint in the Civil War, serving the Royalist forces in Cornwall and Devon.

Prior to Edgar's reform, the mint name is in a Latin form, e.g. *Exaniae Civitas*, and in 1300 it is *Civitas Exoni(a)e*. In between, though there is an odd survival early in Ethelred's reign of the form *Exan*, the usual mint reading is *E(a)xecestre* or an abbreviation of it. In Domesday it is *Execestre*, or similar, and the form found on Henry III's recoinage is *Eccetre*. On the whole there is little ambiguity in the Exeter mint signature, although coins of Axbridge, Canterbury, Leicester, Malmesbury and Oxford have at one time or another been attributed to Exeter on the basis of misreadings or ambiguous inscriptions.

Since the dispersal of the Exeter portion of Mr. Brettell's collection, including numerous and important pieces of all these periods, affords an occasion for recording a fuller series of Exeter coins than has ever previously been available at one time, particularly with regard to the Anglo-Saxon and Norman material, it has seemed worthwhile to preface the catalogue with a survey of the mint and its moneyers. There has not been time to search more than the most accessible sources, but it is hoped that the collation of Exeter material here attempted will serve a useful purpose until a more comprehensive study can be made of this, the most important mint in the counties of Cornwall, Devon and Somerset.

The collection was arranged by Mr. Brettell according to moneyers within reigns, on the same system as used by Hildebrand in his catalogue of the systematic collection in Stockholm and more recently in the Sylloge of the Copenhagen collection. This arrangement has been retained in the catalogue, and the tables and notes below on individual moneyers are treated in a similar way. In the tables, the letter B indicates a type

represented in the Brettell collection and therefore illustrated by at least one specimen in this catalogue. An X indicates a known type not represented in this collection, and a reference to the most accessible record, and if possible illustration, of the type in question is given under the moneyer concerned. In this connection, it is worth noting that the work of the Devonian Sainthill on coins of the mints of his native county, scattered through the two volumes of *Olla Podrida*, is still useful, not least for the admirable line drawings of many coins, including some of which illustrations are not otherwise available (e.g. William II, BMC type III).

During the later Anglo-Saxon and Norman periods, the Exeter mint was both part of a national administration and an important regional centre in its own right. The former aspect is reflected in conformity to national patterns of coinage and to centrally promulgated coin-types; the latter in certain characteristics of West Country coinage which are noted in the following pages. Often dies were issued from London, like those of other mints throughout the country: this was certainly the case in the later recoinages between 1180 and 1695, and probably also during much of the two centuries before 1180. On other occasions the distribution centre for Wessex seems to have been Winchester, as under Alfred or in the later period of the *Crux* issue of Ethelred (*Intermediate Small Cross* type).

Localized die-cutting in the Devonshire area has been postulated in the Edwig-Edgar period and at the end of Ethelred's reign and the beginning of Cnut's. There are also certain typological variations, of a local character, which involve Exeter and neighbouring mints, such as the absence of Ethelred's true *Benediction Hand* type but the existence of mules with *Crux* reverses, and the occurrence of an early variant of the *Crux* type itself with a right-facing bust. Other typical features of Exeter coinage are the greater frequency of the Harthacnut than of the Cnut reading on coins of the *Arm-and-Sceptre* type, and of obverses of Harold II without the sceptre than of those with it.

There are also a few instances of the use of irregular and perhaps locally made dies at Exeter in coinages where die-cutting appears generally to have been centralized. One of these (Brettell No. 62) is a makeshift *Crux* type reverse of Ethelred used with an obverse of the *Intermediate Small Cross* issue. Another occurs in the sixth type of William I and a third in the Tealby period. In any or all of these cases, some interruption in communications with the normal source of dies, or some local emergency, may have resulted in the need to manufacture dies on the spot without delay.

Mention should also be made of other irregular coins bearing the Exeter mint signature. Following the large payments of Danegeld in Ethelred's reign, English types were extensively copied in the Baltic region, the most popular type being Ethelred's *Long Cross*. Examples of this are Brettell No. 135 (cf. Copenhagen 1457 and Hild. 605) and Hild. 606, which are copied from Exeter coins of Wynsige. Copies of the *Crux* type are less common, but Brettell No. 133 (Copenhagen 1455-6) is copied from a coin of this type by the Exeter moneyer Aelfstan. A later imitation is the coin described and illustrated by Hildebrand as his type El of Cnut (H. 419). The obverse of this is copied from the *Quatrefoil* type, with an ornament

before the face, but on its reverse there is an annulet in each angle of a long cross. The inscription is clearly copied from an Exeter coin of Wine—  
PINE ON EAXE.

Before the end of Edgar's reign, evidence for the activity of the Exeter mint is scanty (see Table A). Coins are known with its mint signature of Alfred (871-99), Athelstan (924-39), Edwig (955-9) and the earlier years of Edgar (959-75), but they number less than two dozen in all. The code of laws, of uncertain date, issued by Athelstan at Grately in Hampshire gives the number of moneyers to which various mints were entitled, and Exeter, with two, figures amongst the relatively few named mints of Wessex, the others being Winchester (six), Southampton (two), Wareham (two), Dorchester (one) and Shaftesbury (two).

The earliest autonomous coinage of Exeter, and perhaps its earliest issue of all, belongs late in the reign of Alfred, when a distinctive coinage was produced at the two Wessex mints of Winchester and Exeter, having as reverse type the first three letters of the mint name written vertically down the field. Until recently these extremely rare coins were each known from only two specimens, all from the huge treasure found at Cuerdale, Lancashire, in 1840, but the 1958 Morley St. Peter hoard from Norfolk contained two more of Winchester and another of Exeter. All three EXA coins are from the same pair of dies, and one of those from Cuerdale (the other is BMC 79) appropriately heads the Exeter series in the Brettell collection. This Wessex coinage did not long survive the death of Alfred, being known only at Bath at the start of the reign of Edward the Elder (899-924).

Under Edward and during much of the reign of Athelstan mint names are almost entirely absent from the coinage. There are, however, a few non-portrait coins of Athelstan, with a small cross as the type on each side (BMC type V), which carry an Exeter mint signature. Some have the circumscriptio *RAEGENOLD MO EAXANIAE CIV*, or similar, specimens being in the British Museum (BMA 516) and in the Forum hoard from Rome (No. 206); and another (Forum hoard 205) is of a moneyer Abun, reading *EAX CIVITA*.

Like Alfred's, Athelstan's introduction of mint names did not endure, and hardly any are found on the coins of either Edmund or Eadred. Brooke attributed some portrait coins of the latter (Brooke type 3) to the mint of Exeter, but this is a matter of considerable doubt. One of Ascer in the British Museum (Brooke *English Coins*, pl. XV, 7) and those of Wilfred read *MONEILX* (BMC 120) or *MOETAT(AT)*, and the explanation of these readings seems more probably to be in the fortuitous association of an E in the abbreviation of *MONETA* with an X as a space-filler. For a similar reason, coins of Edmund reading *CLACMONEX* or similar which have at times been allocated to Exeter (*e.g.* Lockett 588 and 3697) were rightly not accepted as such by Brooke. The same objection arises in the case of two supposed Exeter moneyers of Athelstan, Cenard (BMC 5) and Sigeland (Brooke p. 59), neither of whom were accepted as moneyers of this mint (or area) by Mr. Blunt in his paper on the coinage of this reign read to the British Numismatic Society on 28th June, 1966.

	Alfred	Edward the Elder	Athelstan	Edmund	Edred	Edwig	Edgar Pre-reform	Portrait/Small Cross Type			Later Ethelred
								Edgar	Edward	Ethelred	
No moneyer	B	Not Known		Not Known	Not Known						
Abun			X								
Raegenold			X				X				
Aethelgar						X					
Mangod							X				
Aelfstan							B	X		X	X
Aethelnoth								X			
Iohan								X	X		

Table A – Exeter Moneyers of the Early Period

A few of Edwig's coins do have mint names, generally as part of an inscription in horizontal lines, but in this reign (BMC type V) and the earlier part of Edgar's (BMC type III) a south-western type occurs with a small cross and circumscription, the coins being characterized by unusually broad flans, very small neat letters (including A with top bar but no cross-bar and S as Z), and a tendency for the inscriptions to begin and end with a cross and to contain stops (a cross, group of three pellets or colon) before the mint name if present. Of Edwig, there is a coin of this kind in Copenhagen (Sylloge No. 762) by the moneyer Aethelgar with the indisputable mint signature EXA CI(VITAS), and the only other two mints of this group which can certainly be identified are both in Devonshire, Totnes and Barnstaple. Of Edgar, comparable coins which can be attributed to Exeter have been found in the 1894 Douglas (Isle of Man), the 1929 Smarmore (Co. Louth) and the 1950 Chester hoards. The coin thought to be from the Douglas hoard is a fragment reading R-OLD MO EXA (BNJ XXXV, pl. XIV, 18). The moneyer is presumably Raegenold like Aethelstan's, and, although at least twenty years apart in time, perhaps the same man, since coins without mint name exist by a moneyer or moneyers Raegenold of all the intervening reigns, his coin of Eadwig (Lockett 2749) having, significantly, three pellets at the end of the inscription on the obverse. The Smarmore coin, which is in the National Museum in Dublin, is by the moneyer Mangod and also reads EXA CI (BNJ XXVII, pl. VI, 54). The Chester example (BNJ XXVII, pl. V, 459) is from the same pair of dies as Brettell No. 2, and reads MO:E+, the cross being probably not designed as an X. An Exeter attribution can, however, be regarded as probable in view of the apparently deliberate colon after MO and the Devonshire connections of the group. The inscription begins EAD (trefoil) AELFZTAN, the first three letters being perhaps not part of the moneyer's name—possibly a repetition from the royal name, as if the engraver had started to cut the die as for an obverse—since Aelfstan is known to have been an Exeter moneyer in Edgar's recoinage and in the first half of the reign of Ethelred II.

A coin of Edgar's pre-reform portrait type in the Chester hoard (pl. V, 492), of the moneyer WHEBIRHT, was doubtfully assigned to Exeter as reading MOEA, but this may be no more than a contraction of MONETA.

There is no reason to suppose that Exeter was not active between c. 900 and the end of Edgar's reign at other times than the few occasions on which signed coins were struck. Some clues as to the coins which may have been struck there can be had from following forward or backward the names of moneyers, such as Raegenold, who struck coins with the mint signature, though there are dangers in assuming that the same name necessarily refers to the same moneyer, or that the same mint is to be implied. For example, Mangod, though an Exeter moneyer's name early in Edgar's reign and in the middle of Ethelred II's, coins at Winchester under Edwig (BMC pl. XII, 13), and Raegenold is itself a Winchester moneyer's name in Edgar's recoinage. Like those of most other mints in the first three-quarters of the tenth century, Exeter's coins cannot for the most part be identified specifically. The regional attribution of English coinage of this period remains a major problem, and one which requires much further study.

The main features of the monetary reform introduced by Edgar not long before his death in 975 were the standardisation of the coin type (with a portrait on the obverse) throughout the kingdom and the invariable record of the mint as well as the moneyer's name on the reverse. The type, which has a small cross on the reverse, was continued unchanged under Edward the Martyr (975-8) and was not immediately replaced on the accession of Ethelred II (978-1016). Exeter coins of the new type are known of all three reigns, although owing to the lack of hoards the type is especially rare for southern mints and it is unlikely that surviving coins are anywhere near fully representative.

The moneyers of the reform type are:

AELFSTAN, as mentioned above perhaps a pre-reform moneyer, and a name found also in the first two main types of Ethelred: Aelfstan's reform coin of Edgar is illustrated in the Copenhagen Sylloge, No. 769 (*cf.* H.6). No coin of Edward is known, but there is a specimen of Ethelred's *First Small Cross* in Stockholm (H.461), with the reverse reading MOT EXAN, both early forms which were soon to be superseded. His later issues are represented by coins of *First Hand* and *Crux* in the Brettell collection, and of *Second Hand* in Copenhagen (Sylloge No. 146, *cf.* H.465).

AETHELNOTH is known only from a coin of Edgar in the Igelösa hoard.

GODWINE's early coin of Ethelred is H.541 (H. B. A. Petersson, *Anglo-Saxon Currency*, pl. I, 3), and he was also active in the earlier part of the next type (*First Hand*, Brettell Nos. 71-3; see below).

IOHAN's name is found only under Edgar and Edward. Of the former, his coin in the British Museum (BMC 6) has the spelling Iuhan; of Edward, his coin is illustrated in the Glasgow Sylloge, No. 740 (*cf.* H.4). This is a most unusual name at this period and one not otherwise found on English coinage between Edgar's reform and the reign of Stephen, although it had occurred on coins of Athelstan.

Edgar's system developed into a pattern of regular type changes with at least partial withdrawal of earlier issues. In Ethelred's reign there were five such main types—*Hand* (with two major and one minor division), *Crux* (Hildebrand type C), *Long Cross* (D), *Helmet* (E) and (*Last Small Cross* (A)—and in Cnut's (1018-35) three—*Quatrefoil* (E), *Pointed Helmet* (G) and *Short Cross* (H). After Cnut's death, the names of both his sons Harold and Harthacnut appeared on coins of *Jewel Cross* type for a period of theoretical joint rule (1035-7), but Harold emerged as sole king and struck a *Fleur-de-Lis* type (1037-40). The coins of Harthacnut's sole reign (1040-2) have a new type of portrait showing his *Arm-and-Sceptre*, and some of them have the name shortened to *Cnut*. The more frequent change of type was maintained under Edward the Confessor (1042-66) and indeed throughout the Anglo-Norman period until the Civil War of Stephen's time when the coinage system fell casualty to the general breakdown of administration.

The known types of Exeter coins and their moneyers of this period are set out in tables B, D, F and G. All the main types are recorded for this mint from Edgar to the end of the reign of William II, but the most plentiful

are those of Ethelred and Cnut, during whose reigns Exeter and the other south-western mints were at their most active. Out of 772 coins of these two kings found in the recent hoard from Tingstäde on Gotland, as many as 44 were of the Exeter mint, which, even if the hoard is not fully representative, gives some measure of its relative importance at this time. The material for Ethelred and Cnut is now well illustrated in the *Sylloge* volumes of the Royal Collection in Copenhagen, which, though less complete than the systematic collection in Stockholm catalogued by Hildebrand, nevertheless covers the series quite fully.

An important feature of West Country coinage, particularly at this period, is the occurrence of certain moneyers' names at more than one mint in circumstances which suggest that the moneyer could well have been the same individual. Under each name notes have therefore been added recording any other mint in the area where the same name occurs without a significant gap in time. This pattern is observed even as late as the Norman period, and although the marked regional associations of certain names may in some cases account for their multiple occurrence on the coinage of the area, there are others, such as Hunewine, where a single individual seems to be implied by the rarity of the name itself, by the sequence of types in which the various mint names occur, and by the discovery of an obverse die-link between two of them. A number of such obverse die-links involving the Exeter mint have been already discovered, as noted below, but it is hoped that the record of which names are found elsewhere may lead to the identification of others.

The first new type of Ethelred's reign, with the Hand of Providence on its reverse, exists in three clear divisions, of which *First Hand* (Hildebrand B1) has no sceptre and *Second Hand* (H. B2) a trefoil-headed sceptre and extra ornaments on the reverse. Exeter coins of both are quite plentiful. None, however, are known of Exeter, or indeed of any other mint in this area, of the late *Benediction Hand* type (B3), which has a cross-headed sceptre on the obverse. That obverse dies at least of this type reached Devonshire is demonstrated by the existence of mules (of extremely rare occurrence elsewhere in the country) between *Benediction Hand* obverses and *Crux* reverses at Barnstaple (moneyer Byrhsige, H.27) as well as Exeter (moneyer God, Brettell No. 68). In addition to Aelfstan and Godwine continuing from *First Small Cross*, there are six new moneyers' names which begin at Exeter in *First Hand* and five more in *Second Hand*. The new names found in *First Hand* are:

AELFNOTH, who is recorded for *First* and *Second Hand*, *Crux*, *Long Cross*, *Helmet* and *Last Small Cross*, all represented in this collection except the first (H.447). The name is also found at Axbridge in *Long Cross*, but from only a single pair of dies.

BRUN's Exeter coins are of *First Hand* only, and the same name occurs in this type on the unique coin of the Cornish mint of Launceston in the British Museum ex Montagu (BNJ XXX, 62). A BRUNA, probably not the same man, occurs at Lydford in *Helmet*, *Last Small Cross* and Cnut's *Quatrefoil*.

BYRFERTH, a rare moneyer, is known at Exeter in *First Hand* (Copenhagen 152), *Crux* and *Long Cross*, and at Totnes in *Helmet*.

Table B – Exeter Moneyers of Ethelred II

BYRHSIGE, at Exeter in *First* and *Second Hand* and *Crux*, is a name found in all main types from *First Hand* to Cnut's *Quatrefoil* at Barnstaple and also at Wareham in *First Hand*, *Crux* and *Long Cross*.

LUDA is quite a prolific moneyer in the two *Hand* types and *Crux*.

TUNA is named on coins of *First Hand* and *Crux*, one of the latter in the Brettell collection (No. 110) having a small obverse die, with some similarity to the *Small Crux* issue (H. type Ca).

A coin of the *First Hand* type, with a reverse die of irregular style, supposedly reading LEMAN M-O EAXE, was attributed to Exeter in the Lockett catalogue (lot 672). However, the reading is very doubtful and the mint at which this coin was struck, if an official one, is quite uncertain.

The two moneyers who began with *First Small Cross* (Aelfstan and Godwine) are of particular interest in that the name of each was to appear also at both Lydford and Totnes. Aelfstan continues at Exeter until *Crux*, and the name is then found in *Crux* and *Long Cross* at Totnes and in the latter at Lydford too. Godwine's coins at Exeter end with *First Hand*, but Lydford coins are known for *Second Hand* and an early variety of the *Crux* type with right-facing bust, and the name then appears at Totnes in *Crux* proper, *Long Cross* and *Helmet*. The sequence of types at the same three Devon mints for both Aelfstan and Godwine suggests that the same individuals may have been involved.

The five new moneyers in *Second Hand* are Byrhan, God(a), Leofric, Leofsunu and Manna:

BYRHAN, recorded for *Second Hand* (Copenhagen 160), *Crux* (Brettell No. 29), *Intermediate Small Cross/Crux* mule (H.491) and, after a gap, *Last Small Cross* (Brettell Nos. 30-35), is not a name found at other mints in the area.

GOD, or GODA, is one of the most remarkable of the south-western names. Its Exeter representation runs from *Second Hand* of Ethelred (Copenhagen 183) to *Pointed Helmet* of Cnut. The *Crux*, *Helmet* and *Last Small Cross* types are not included in the Brettell collection but are illustrated in the Copenhagen Sylloge, respectively Nos. 181, 182 and 180. Beside the normal *Crux* type, this moneyer also struck a mule with an obverse of *Benediction Hand* (Brettell No. 68), an early variety of the *Crux* type with right-facing bust (H.4353), and the *Small Crux* variety (Copenhagen 185). Hildebrand No. 4353 is a most interesting coin. Like No. 3064 of Lydford, it was classed by Hildebrand as his type Cc, of which the illustrated example is a *Second Hand/Crux* mule. But on neither of these coins is the head diademed, and the suggestion of Mr. Dolley and Mr. Elmore Jones that the Lydford coin is really not a mule but an early transitional variety of the *Crux* type proper is greatly strengthened by the recognition of this second example at a neighbouring Devonshire mint. H.4353 is of additional interest in having the drapery fastened on the right (king's left) shoulder, a feature only otherwise found on comparable coins of Wilton and Hertford.

The name GODA is also found at no less than six other mints in the south-west, and the known types are set out in the following table:

	ETHELRED II					CNUT			
Hildebrand Types	B1	B2	C	D	E	A	E	G	H
Cadbury						X			
Exeter		X	X	X	X	X	X	X	
Gothaburh						X			
Ilchester	X	X	X	X	X		X		
Lydford			X	X		X			
Shaftesbury	X		X	X	X		X	X	X
Totnes						X			

**Table C – West Country Mints of the Moneyer God(a)**

The break at Ilchester and Shaftesbury comes exactly where Totnes, *Gothaburh*, and Cadbury appear. It is certainly curious that the name appears at Exeter, Ilchester, Lydford and Shaftesbury in consecutive types, but nevertheless it seems likely that less than four separate moneyers are involved. There are die-links between Exeter and *Gothaburh* in both *Last Small Cross* of Ethelred and *Quatrefoil* of Cnut, the former involving the moneyer God. The sequence of strikings in this link seem to be: God at Exeter, Wulfmaer at *Gothaburh* and then back to Exeter for Byrhstan. In view of the apparent mobility of Hunewine, discussed below, whose name appears at four of the same mints as Goda, it must be regarded as a distinct possibility that at all seven mints the latter name represents a single person. If so, it raises interesting considerations regarding the interrelation of local mints and their respective periods of activity within a particular type.

LEOFRIC's coins are of *Second Hand* and *Crux* at Exeter, and the name is also found at Ilchester in the latter type.

LEOFSUNU is recorded at Exeter only in *Second Hand*.

MANNA, though not known of *Crux* or *Last Small Cross* at Exeter, seems likely to be the name of a single moneyer at this mint from *Second Hand* (H. 576) to *Pointed Helmet* (Copenhagen 468-9); the Ethelred *Helmet* coin is Copenhagen 204. The name appears appears also at Totnes in *First Hand*, *Second Hand* and *Crux*.

One further name is given by Hildebrand under Exeter for *Second Hand*, CUDI (H. 503), but this is perhaps for LUDA, sometimes spelt LUDIA (H. 574).

Most of Exeter's sixteen *Crux* moneyers had already been active in *Hand*. The six who are new in the type are Aelfric, Cytel, Edric, Edwine, Hunewine and Wynsige:

**AELFRIC:** Coins of this moneyer begin in the *Crux* type, but not with the main issue, being of *Small Crux* (H. type Ca), a lightweight variety, struck on smaller flans from dies of reduced module (H. 454-5), and of H. type Cb, the mule with *Crux* type reverse and obverse (without sceptre) belonging to the *Intermediate Small Cross* issue (H. 456). Aelfric's *Long Cross* type is in the Copenhagen Sylloge (No. 143) and two specimens of *Helmet* are in the Brettell collection (Nos. 11 and 12). The continuity of a single moneyer named Aelfric is uncertain, since the name appears again under Cnut and Edward the Confessor, but with breaks from *Last Small Cross* to Cnut's *Short Cross* and in other main issues thereafter.

**CYTEL's** coins are all of the *Small Crux* variety, a most unusual feature.

**EDRIC** is well represented in *Crux* and *Long Cross*, and in three varieties of H. type Cb. One of these (Brettell No. 61) is a normal *Intermediate Small Cross/Crux* mule and the second is also a *Small Cross/Crux* mule but from a makeshift reverse die, with the letters CRVX retrograde, presumably manufactured locally when the *Intermediate Small Cross* type was withdrawn and reverses of *Crux* type were again required (Brettell No. 62). The third coin (Copenhagen 174) is also a mule, though its obverse is not of the *Intermediate Small Cross* issue but belongs to a small group of late (*Transitional*) *Crux* dies which often lack the sceptre and/or diadem and which have lettering from a new fount with top-barred A and various other characteristics. The obverse of Edric's coin is a very typical example of *Transitional Crux*, with a curly-headed portrait (stylistically approaching that of *Long Cross*), no diadem and no sceptre—the first (A) of Mr. Dolley's four varieties of *Transitional Crux* and known only of mints in the south-west (Bath, Dorchester, Exeter, Wareham and Winchester). The reverse of this coin has the normal lettering of *Crux* and it is therefore to be regarded as a mule. An Edric is also a moneyer at Taunton in *Last Small Cross* and *Quatrefoil*.

**EDWINE** is found in *Crux* proper (Copenhagen 178), *Small Crux* (Copenhagen 177) and *Helmet* (Brettell No. 66). There is a long gap until this name appears again in Cnut's last type.

**WYNSIGE's** coins are mainly of *Long Cross*, but he is also known for *Crux* (Copenhagen 217) and Cb (Brettell No. 125).

In addition to the *Intermediate Small Cross/Crux* mules of Aelfric, Byrhtstan, Edric, Hunewine (see below) and Wynsige, there are also coins of this type (British Museum, BNJ XXXVII, p. 16, fig. 4; H 528) from a second makeshift die, with the inscription EYRHIEDM—OEAYE. E for B is found elsewhere at this period (*cf.* coins of "Eyrhsige" at Wareham, Copenhagen 1299 and H. 3955), but although there are several Byr- moneyers at Exeter, there is none (such as Byrhtred) which would very obviously have given rise to this particular blundering. These coins are from the same obverse die as the Cb of Wynsige.

No Exeter coins are known of the true *Intermediate Small Cross* type, although all eight mints of the type are in the south and west, the nearest being Barnstaple and Ilchester. Generally the mints of the Cb mules and

of the *Intermediate Small Cross* type proper are mutually exclusive, though Ilchester is one of the three out of eleven Cb mints where the true type is also known to have been struck.

HUNEWINE is perhaps the most interesting of all names that occur on coins of Exeter. His types for this mint are few—*Crux* and Cb of Ethelred, *Quatrefoil* of Cnut and one or two Edward the Confessor types of c. 1050. However, the name Hunewine appears on every main type from *Second Hand* of Ethelred to *Pointed Helmet* of Cnut, at a total of six mints. The sequence is as follows:—

Type	Mint	Reference
Ethelred II		
<i>Second Hand</i>	Totnes	H. 3852-3
<i>Crux</i>	Totnes	H. 3854
"	Exeter	Brettell Nos. 74-5; H. 544-5
"	Ilchester	H. 1032
<i>Int. Small Cross/Crux</i> mules (H. type Cb)	Exeter	H. 546; BNJ XXVIII, pl. IV, 15
"	Ilchester	BNJ XXXVI, pl. IX, 28 (Tingstäde hoard)
<i>Long Cross</i>	Watchet	H. 3882-4; Copenhagen 1274
<i>Helmet</i>	Watchet	H. 3885
<i>Last Small Cross</i>	Watchet	H. 3881
Cnut		
<i>Quatrefoil</i>	Watchet	H. 3587-8
"	Exeter	BMC pl. XVII, 12
"	Axbridge	BNJ XXX, pl. VI, 8-9
"	Lydford	H. 2509; BNJ XXIX, p. 67, fig.
<i>Pointed Helmet</i>	Lydford	H. 2510; BNJ XXIX, p. 67, fig.

It will be noticed that, with the exception of Hild. Cb, which is, anyway, only a mule type within the *Crux* issue, Hunewine's name does not appear in two consecutive types at the same two mints. This means that all the listed varieties could be explained as the products of a single moneyer on a protracted itinerary—starting at Totnes, passing *via* Exeter to Ilchester (or *vice versa*) in *Crux*, then on for a longish period of activity at Watchet before moving finally to Lydford, after brief stops at Axbridge and Exeter, early in Cnut's reign. The two Cb coins appear to be from the same *Intermediate Small Cross* obverse die, and this link between the Exeter and Ilchester mints would assist the probability of a single moneyer being involved at the various mints. Furthermore, Mr. Lyon has observed that Hunewine's *Quatrefoil* coin of Lydford appears to be from the same obverse die as a coin (H. 3589) of the moneyer Aelfsig at Ilchester.

Seven moneyers active in the *Long Cross* type have already been noted, having been active in earlier types. In addition there are six newcomers, Byrhtic, Carla, Dunstan, Mangod, Wulfsige and Wulfstan:—

BYRHTRIC is only known at Exeter in this type, but the name had appeared in *Second Hand* and *Crux* at Wareham.

CARLA is a name found at Exeter in the four types from Ethelred's *Long Cross* to Cnut's *Quatrefoil*, and again, after a break, in the *Jewel Cross*

issue of Harold I and Harthacnut. There are also coins of *Gothaburh* by this moneyer in *Quatrefoil*, and a die-link between his coins of the two mints (BNJ XXVIII, pl. XXII, A and 9) effectively establishes the identity of the moneyer at the two places. One of Carla's coins of *Last Small Cross* (Brettell No. 42) has the unusually full reading ON EAXCESTRE MO(*netarius*).

DUNSTAN, only known in *Long Cross*, appears nevertheless to have been quite a prolific moneyer, to judge from the number of surviving specimens.

MANGOD is also confined to this type, but his coins are much fewer.

WULFSIGE is known from *Long Cross* to Cnut's last type, with the exception of *Last Small Cross*. His coin of *Quatrefoil* is illustrated in the Glasgow Sylloge, No. 894.

The last four moneyers are only found at Exeter and not at other mints in the region.

Of the ten Exeter moneyers of *Helmet*, eight have been already named, and the other two, AELFMAR and DUDEL, are known only in this type; neither name occurs at any neighbouring mint.

No coins are known from mints in the south-west of the *Agnus Dei* type which was issued from a few towns, mostly in the midlands, at the transition from the *Helmet* type to *Last Small Cross*.

Of the eleven moneyers found at Exeter in *Last Small Cross*, five had been active earlier in the reign, two are only known in this type, and the other four were to continue into Cnut's reign. The two new moneyers of this type alone are:

AETHESTAN, also found at Lydford in the same type.

EATSTAN is not found elsewhere in the south-west.

The four moneyers who begin with *Last Small Cross* and also strike later (of whom only Saewine's name appears at other mints in the area) are:

EADMAER, who is known for all the main types from Ethelred's *Last Small Cross* (Copenhagen 170-1) to the second (*Radiate*) type of the Confessor, with the exception of Cnut's *Short Cross*. His coins of the *Quatrefoil* issue are represented in Copenhagen (Sylloge 431, 3259). His *Jewel Cross* coins have the names of both Harold and Harthacnut (H. 216). A cut halfpenny in the Brettell collection, No. 207, of the Confessor's first issue, the *Pax* type, has the name Ed... and may be of this moneyer (cf. H. 89, 90).

ISEGOD lasts only into the first type of Cnut, *Quatrefoil* (H. 397-9).

SAEWINE's Exeter types, all represented in the Brettell collection, are Ethelred's *Last Small Cross* and Cnut's *Quatrefoil* and *Pointed Helmet*. In the last two of these, the same name is found at Lydford, and from *Long Cross* to *Quatrefoil* it occurs also at Shaftesbury.

THURGOD, like Isegod, ends in *Quatrefoil* (Copenhagen 483-4; cf. BMC 59).

During the last years of Ethelred's reign, the central administration was under strain and a clear pattern of regional styles can be observed in the *Last Small Cross* type which was in issue at this time. The Exeter coins of this type are of what Mr. Dolley has termed the "South-western" style, to

which all the coins of the other Devon mints (Barnstaple, Lydford and Totnes) and of certain other neighbouring mints (Cadbury, Dorchester, Taunton and the unidentified *Gothaburh*) belong.

Of the sixteen names recorded for Exeter in Cnut's first type, only six are new, Edsige, Godbryt, Godwine, Wine, Wulfmaer and Wulfric:

EDSIGE's coins are of *Quatrefoil* and *Pointed Helmet* of Cnut, and of Harold's *Jewel Cross* type. The missing type, *Short Cross*, is known with the name EDSIGE WARE, and there is therefore reason to think that the additional name may not in this case have been used to distinguish another moneyer. The name Edsige is not found elsewhere in the south-west at this time, and its recurrence in the fifth type of the Confessor may denote a different man.

GODBRYT is a *hapax* in the Anglo-Saxon coinage. This most unusual name occurs on a *Quatrefoil* coin in Copenhagen (Sylloge 455).

WINE's activity at Exeter appears to be confined to the *Quatrefoil* type. However, a moneyer by the name of WINAS or WINUS, who could possibly be the same person, strikes at Crewkerne, Ilchester and Cadbury between *Long Cross* of Ethelred and *Short Cross* of Cnut (see BNJ XXVIII, 101).

WULFMAER, a name hitherto unrecorded for Exeter, is a *Gothaburh* moneyer in the last three types of Ethelred and the first of Cnut. A *Quatrefoil* coin of Exeter in Copenhagen (Sylloge 486) reading WULFME is presumably by the same man.

WULFRIC is also known only for *Quatrefoil* (H. 420) and not elsewhere in the south-west in this or adjacent types.

GODWINE, a very common name and one which had already occurred at Exeter early in the reign of Ethelred, reappears at this mint in Cnut's *Quatrefoil*, probably representing a new moneyer. The name is also found at Ilchester in this type, and at Milborne Port, close to Ilchester, in the next type, *Pointed Helmet*.

As in Ethelred's last type, distinct regional styles can be identified in Cnut's first coinage. The Devonshire style (Mr. Dolley's style A), to which almost all the Exeter coins belong, is easily recognizable from the hoops of drapery around the neck. As well as the coins of Exeter, this style covers all those of Barnstaple and Totnes, some of Lydford, and some also of the Somerset mints of Crewkerne, Ilchester and Bath. There is also one Exeter coin (H. 369) of the moneyer Carla which Mr. Dolley classifies as of his style C, a style with its representation firmly centred in Somerset (Bruton, Cadbury, Ilchester, Langport, Taunton and Watchet), but with a few examples at Lydford as well as the one at Exeter in Devon. At Exeter there is, in addition, one *Quatrefoil* obverse die (H. 370; Copenhagen 429) with a diadem instead of a crown. This variant (Hildebrand's type Ed) has a regional focus in the Severn Valley, the main mints at which it is found being Bristol, Gloucester and Hereford. It is not otherwise found in Devonshire, except for the one case at Exeter, but it also occurs at Crick-

	Ethelred	Cnut			Jewel Cross			Harold I F-de-lis	Harthacnut		Edward Conf.

Table D — Exeter Moneyers, Cnut to Harthacnut

lade and Bruton; although there are outliers at the major mints of London and Winchester, it is not found elsewhere outside the south-west.

An interesting reverse variety of the *Quatrefoil* type (Hildebrand's type Ei) has a trefoil instead of a single pellet on each cusp of the quatrefoil on the reverse. This is found at Exeter of the moneyers God (Brettell No. 156), Hunewine (BMC pl. XVII, 12) and Wulfsige (Brettell No. 172). The mints of this variety are widely scattered, mostly in southern England, although its occurrence at the three Devon mints of Barnstaple, Exeter and Lydford represents a closer concentration than elsewhere.

Eight of the *Quatrefoil* moneyers have fallen out before *Pointed Helmet*, two more of them are known for later issues but not in this one, and eight new names, Aelfstan, Aelfwine, Dodda, Ealdabeard, Leofwine, Lifinc, Scula and Wulfwerd, are found in this type:

AELFSTAN, mentioned above as occurring at Exeter and other nearby mints in the early and middle years of Ethelred, is a name which recurs at Exeter in *Pointed Helmet* (Copenhagen Sylloge 418), with the unusual mint signature EAXCA. The name also appears in the *Arm-and-Sceptre* type of Harthacnut (H. 29).

AELFWINE is known at Exeter in *Pointed Helmet* and *Short Cross* of Cnut and early enough in the Confessor's reign to be perhaps the same moneyer. The name is, however, extensively found elsewhere in the region at this period (*cf.* the mints of Goda), as shown in Table E below:

Type	Ethelred		Cnut			Harold Lis	Harthacnut Arm & Sc.
	E	A	E	G	H		
Shaftesbury	X	X	X				
Cadbury		X					
Bruton			X				
Ilchester			X	X	X		X
Exeter				X	X		
Totnes				X			
Lydford						X	

Table E Mints of the moneyer Aelfwine

DODDA, though not known in the period from Cnut's *Short Cross* to Harold I's *Fleur-de-Lis*, is recorded for *Pointed Helmet* (Copenhagen 430), *Arm-and-Sceptre*—in which type he is the only Exeter moneyer found with both the Cnut (H. 372) and Harthacnut spellings—and the first (*Pacx*) type of the Confessor.

EALDABEARD, a most unusual name, is found only at Exeter and only in *Pointed Helmet*.

LEOFWINE is known at Exeter in *Pointed Helmet*, Harold's *Fleur-de-Lis* type, *Arm-and-Sceptre* of (Hartha-)cnut (H. 402) and in Edward's *Pacx* and Radiate (H. 91-2) types. This common name had occurred under Ethelred (*Long Cross*) at Taunton; but the Exeter moneyer is more likely to be the same man as the Ilchester Leofwine in *Pointed Helmet*, and perhaps also as the Axbridge Leofwine in *Short Cross* and (Hartha-)cnut's *Arm-and-Sceptre*.

LIFINC, a prolific moneyer of the Confessor, is known for the last two types of Cnut, *Pointed Helmet* (British Museum) and *Short Cross* (H. 403), but is unrecorded for several intervening types. This common name is not otherwise found in the area.

SCULA is only at Exeter and his types are *Pointed Helmet* (H. 412-3) and *Short Cross* (H. 414).

WULFWERD, whose name is found on an Exeter coin of *Pointed Helmet* (H. 426), is also the moneyer of an extremely rare (and probably accidental) variety of the same type without a sceptre, with the mint name TOTE (for Totnes) cut into the die over EAXEC, which misled Hildebrand into reading TOTEL (H. 3566) and postulating a non-existent mint at Tottleigh in Derbyshire.

In the *Pointed Helmet* type also a number of die-cutting styles have been identified. However, in contrast with those of the two preceding issues, they do not for the most part appear to have a primarily geographical significance. Dies of the styles to which Exeter coins of this type belong seem to have been distributed on a national basis and were used at a large number of mints.

In Cnut's last main type, *Short Cross*, nine moneyers are known to have operated, of whom only two are certainly new:

HUNEMAN is found only in this type. The name had occurred a good deal earlier at Totnes in the last type of Ethelred.

THEGNWINE is known for Cnut's *Short Cross* (H. 415-6; Glasgow 933) and the *Jewel Cross* type in the name of Harthacnut with both right and left facing busts (H. 39, 38). This rare name is confined to Exeter.

The name AEFICC, which is found in *Short Cross*, is not itself found earlier, though an Aelfric is. Aelfric's latest previous type at Exeter had been *Helmet* of Ethelred. Coins with this name of Cnut's *Quatrefoil* (BMC 56; BNJ XXX, pl. VI, 3-7) which have in the past been attributed to Exeter have now been convincingly assigned by Mr. Elmore Jones to Axbridge. The Axbridge moneyer might be the same man as the Exeter moneyer of Ethelred, or perhaps the Exeter moneyer Aeficc of Cnut, though there is a missing type in between in each case. The Confessor's Exeter

moneyer by the name of Aelfric (from his fourth type) is presumably a different man.

EDWINE is also known under Ethelred in *Helmet* (and earlier) at Exeter, and then again in Cnut's last type. The name is found on two later occasions at this mint.

After the death of Cnut, an important change took place in the English coinage. During the preceding sixty years only nine types had been issued, but in the next thirty years there were thirteen. The more frequent recoinages were maintained under the Normans, who produced twenty-eight type changes between 1066 and 1135. The start of the period has until recently been in some numismatic confusion as a result of parallel issues in the name of Harold and Harthacnut and the naming of the latter simply as Cnut on some of his coins. The flow of English coins to Scandinavia, first with the Danegeld and then the Heregeld, was coming to an end and material found in England is henceforth of greater importance. Paucity of material misled Hildebrand over the sequence of the Confessor's types. The earlier issues caused difficulty also to other writers, but the following arrangement proposed by Mr. Seaby is now generally accepted:

*Pax* (Hild. D), *Radiate* (A), *Trefoil-Quadrilateral* (C), *Small Flan* (B) and *Expanding Cross* (E). The last five of Edward's ten substantive types are *Helmet* (F), *Sovereign* (H), *Hammer Cross* (G), *Facing Bust* (Ac) and *Pyramids* (I).

Harold I's coins are of two main types, the *Jewel Cross* issue which he shared with Harthacnut and the *Fleur-de-Lis* on his own. Harthacnut's *Jewel Cross* mints are concentrated on and south of the Thames, and Exeter is well represented. The later coins of the *Jewel Cross* issue show two dotted borders of the mantle overlapping, and those with Harthacnut's name have a right-facing bust. The *Arm-and-Sceptre* type of his own sole reign was struck throughout the country, and is generally rather less rare (though not at Exeter) with the name Cnut than with Harthacnut.

The *Jewel Cross* coinage may be taken as a whole, and is recorded of six Exeter moneyers. Two of them, Haerra and Wulfnoth, are new:

HAERRA is a rare name, found only at Exeter, and in the *Jewel Cross* issue, both of Harold and of Harthacnut (H. 36).

WULFNOTH is found for Harold (H. 137-8) and Harthacnut in the *Jewel Cross* type and seems to be the only moneyer other than Edmaer who also strikes Harold's *Fleur-de-Lis* type (H. 139-40) at Exeter. Though not noted in *Arm-and-Sceptre*, this moneyer also struck the Confessor's first type.

In addition, the name of CARLA, already listed for Ethelred and the first type of Cnut, reappears. Carla's *Jewel Cross* coins are of both Harold (H. 124-5) and (Hartha-)cnut (H. "Cnut" 368).

Harold's *Fleur-de-Lis* type is thinly represented at Exeter, being known only of four moneyers. There is a variety in which the lis in the angles of the reverse appear as trefoils (H. type Aa), but there is no apparent significance in this. Hildebrand gives Hunna as an Exeter moneyer (H. 133), but he is known for Malmesbury, and the reading should be ON MEAL, not ONN EAC (see BNJ XXV, 238); there is also a coin with the name Hunni of

Cnut's last type in Copenhagen (No. 462) which has been attributed to Exeter on the basis of a similar reading but which should likewise, I think, belong to Malmesbury. The one new Exeter moneyer in the *Fleur-de-Lis* type is:

MANLEOF, recorded in this and Harthacnut's *Arm-and-Sceptre* issues only.

*Arm-and-Sceptre* is recorded with the names of seven Exeter moneyers, none of them entirely new. Two of them, AELFSTAN and DODDA, are not recorded for the three main types since *Pointed Helmet*, but may be the same men. EDWINE's name should also be mentioned here. It appears intermittently at Exeter, some of the occasions under Ethelred, Cnut, Harthacnut and the Confessor perhaps representing different individuals. His *Arm-and-Sceptre* coin is in the name Cnut (H. 386). He is not known for the first four of Edward's types.

GODWINE, a name last found in Cnut's *Quatrefoil* type, is recorded for the *Arm-and-Sceptre* type of Harthacnut (H. 35). A *Jewel Cross* coin (H. 34) with the inscription G...NOEX was attributed to Exeter by Hildebrand, but Mr. Dolley has suggested it should be assigned to Oxford (*cf.* H. 160). Godwine is also recorded at Exeter for the Confessor's first type by Mr. Seaby from a coin in the Sigsarve hoard.

Edward the Confessor's moneyers at Exeter often repeat names which had already appeared in earlier reigns, though rarely with such continuity as to make their identity obvious. Those most likely to be the same persons still in office are DODA, EDMAER, GODWINE, LEOFWINE and WULFNOTH, whose coins of the Confessor have been already noted. The new or probably new moneyers are:

AELFRIC, known at Exeter from *Small Flan* (Fitzwilliam 840) to *Hammer Cross*, with the exception of *Expanding Cross*. The name, which had appeared at an earlier period, also occurs under William I. There is an Aelfric at Barnstaple from *Radiate* to *Hammer Cross* with the exception of *Trefoil-Quadrilateral* and *Small Flan*, and at Lydford in *Pacx* (British Museum), *Radiate* (H. 590) and *Small Flan* (H. 407 and BMC 812).

AELFWINE, an Exeter name under Cnut, is known for the Confessor's second and third types. The name appears also on a coin of *Expanding Cross* type of (?) Ilchester (H. 173).

EDSIE is found in *Expanding Cross* only; coins with the name Edsige had been struck in earlier reigns.

EDWOLD is given as an Exeter moneyer of the *Pacx* type by Mr. Seaby, with reference to Montagu sale, part 2, lot 135. Brettell No. 207 could be by this moneyer.

EDWINE is a moneyer of *Expanding Cross* after an interval from *Arm-and-Sceptre*.

HUNEWINE reappears on the Confessor's fourth and fifth types, *Small Flan* (Bliss sale) and *Expanding Cross*. The name occurs as a witness to a document at Exeter in 1046.

LIFINC, a name found in Cnut's last type but not thereafter until Edward's third issue, is known for the run of types from *Trefoil-Quadrilateral* into the Conqueror's reign, with the exception of *Small Flan*, which is rare of

Table F – Exeter Moneyers of Edward the Confessor and Harold II

Exeter, and *Pyramids*. Lifinc's coins of Harold II are without the sceptre, the more common variety at this mint, though generally much the rarer.

SAEWINE, also a name found under Cnut and in the Norman period too, runs from *Expanding Cross* (BMC 213) to *Pyramids*, with the exception of *Hammer Cross*, his *Helmet* coin being BMC 219.

SAEWULF is only a moneyer of *Expanding Cross*.

WICING is a name found only in the eighth type, *Hammer Cross*.

WULFNOTH in *Pyramids* is probably not the same as the Wulfnoth who runs from Cnut to the first type of the reign.

WULFWINE is a moneyer of *Pyramids* only.

WULMAER struck six consecutive types from *Trefoil-Quadrilateral* to *Hammer Cross*. His *Small Flan* coin is BMC 207. This name had occurred briefly at Exeter in Cnut's first type (see above).

A coin, of which die-duplicates are in the British Museum (BMC 232) and the Brettell collection (No. 201), reading EADPARDONE, and supposedly the only case of a moneyer Edward at Exeter, has been convincingly re-attributed by Mr. Elmore Jones to Canterbury, where the name Edward is found at this period.

Harold II's Exeter moneyers are three:

LEOFWINE has already been noted for the period from Cnut to Edward's second type. This is also the name of a moneyer who struck in the Norman period (Lifwine) and under Harold (with sceptre), and to this later Leofwine should probably be attributed the coin of the Confessor's penultimate type (*Facing Bust*) with the name EOFWINE (Brettell No. 211).

BRIHTRIC, also an Exeter moneyer of the Conqueror's first type, struck coins for Harold without the sceptre. The same name appears on the extremely rare coins of Petherton in Somerset in the *Radiate* (Lockett 796) and *Trefoil-Quadrilateral* (H. 634) types, the only issues known of this mint (see *Num. Circular*, 1961, 167); and after an interval of three types on coins of Taunton of the Confessor's *Sovereign* and *Hammer Cross* types, of Harold II, and of William I beginning with a mule of types I/II. It seems not unlikely that the same moneyer was responsible for the Brihtric coins at all three mints, and perhaps even for a *Jewel Cross* coin of Harold I of the mint of Crewkerne, just south of Petherton (H. 85).

LIFINC, whose coins also span the Conquest, has been noted above.

The Norman moneyers of Exeter are represented by relatively few coins, except of the PAXS type of William I. It is likely that recorded examples do not fully represent the active careers of known moneyers, and quite possible that coins were struck in the names of other moneyers as yet unknown, particularly in the middle part of the reign of Henry I of which all coins are so rare. Also, after the reign of William II, the standard of striking deteriorated and many of the later pieces are so imperfectly struck as to render their readings doubtful and incomplete. There is therefore a considerable measure of uncertainty regarding the attribution of some entries in the table. The Brettell collection is notable for several hitherto unpublished pieces which either add new moneyers for their type or confirm

Table G — Exeter Moneyers of the Norman Period

doubtful items in the table, such as No. 245, William I type II of Aelfwine; Nos. 293 and 294-5, of Lifwine under William II, types IV and V, both entries qualified by Brooke; No. 298, Henry I type XIV of Duning (?); No. 299, Henry I type XIV of He(- -)ing; and No. 308, Stephen type I of a moneyer (- -)ier.

Of the moneyers whose names had appeared on the coinage before the Conquest, the most obvious cases of continuity seem to be:

BRIHTRIC, with a brief career under Harold II and in only the first type of William I, perhaps before returning to Taunton.

LIFWINE, whose coin of William I type I (BMC 14) is probably by the same man as the Leofwine of Harold II; coins of Lifwine are also known in William I type VIII (the Beaworth hoard contained 43) and William II types II, IV and V. It is possible, though perhaps not likely, that the same person is represented throughout, but there must have been a number of Leof-/Lifwines as the name goes back to *Pointed Helmet* of Cnut and is found also under Harold I, Harthacnut, Edward the Confessor in his earlier types and perhaps later (*Facing Bust*, "Eofwine"), as well as under Harold II.

LIVINC, Lifinc before 1066, occurs in type I of William I, and this marks the end of a more or less continuous run from early Edward the Confessor, in every type except the *Small Flan* (rare) and *Pyramids*. This name also had appeared earlier, under Cnut.

A fourth moneyer in the Conqueror's first type is GODA, known only from the Brettell specimen and another in Stockholm (Sylloge No. 2) of this type. It is notable that the only occurrence on Norman coinage of a name so well known in the Devon mints under Ethelred and Cnut should be at Exeter.

Mention should also be made here of a reverse die of type I which purports to belong to Exeter. It began its existence with the reading ELFSIONLVNDE, which by a series of additional cuts has been made to appear as ELPNIONEXECSDE (BMC cxlix and pl. II, 6). The Brettell specimen, from a different obverse die from that published by Brooke (16.3 gr.), weighs 15.9 gr. and confirms that the alteration to the reverse inscription was designed to conceal the identity of a moneyer who was striking coins of light weight from regular dies.

Brooke suggested that the ravages of 1068, when Exeter was taken by William following the risings of 1067 while he was in France, could account for the rarity of his second type (*Bonnet*). It marks the first appearance of two new names at Exeter:

AELFWINE, not previously recorded in this reign before type III, but now known for four consecutive types of the Conqueror; presumably a different man from the Aelfwine who struck the second and third types of the Confessor. Brooke discovered that Aelfwine's type III coin in the British Museum is from a later state of the same obverse die as a coin by Sibode of London (BMC No. 184, pl. VII, 4). The reason for this unparalleled die-transfer from the capital to a distant mint is obscure.

SAEWARD, or SEWORD, is recorded for types II, III and V of the Conqueror. Perhaps this moneyer moved to Barnstaple, where the same name is found in types V, VI and VIII. A close relationship appears to have existed between Exeter and Barnstaple at this period, and no less than three obverse die-links between the two mints exist in type VIII (see below).

In this connection it seems worth remarking that two names first occur at Taunton in the type which closes their respective careers at Exeter, *viz.* Brihtric (mule I/II to type IV) and Aelfwine (type V to William II type III). This may be no more than a remarkable coincidence, but the principal mints respectively of Somerset and Devon are not far apart and a link between them would not be a matter for surprise.

Two more names first appear in the third (*Canopy*) type of William I: SWEOTINC, or SWOTTINC, is known for types III and IV, with a mule between the two in the Hunterian Museum, Glasgow (BMC pl. VIII, 11), the obverse die of which has been altered to make it resemble the *Two Sceptres* type.

WULFWINE of types III to VI might be the same man as is recorded in the last type of the Confessor, though the name is very common. His earliest post-Conquest type is illustrated in the Ashmolean Sylloge, No. 47. In type VI, an obverse die used by Wulfwine is of highly unusual style, with the inscription PILLEM:AGLORV, perhaps the result of local engraving (BMC 406, pl. XIV, 11).

The traditional Exeter name SAEWINE occurs over a long period of the Norman coinage ranging from the fourth (*Two Sceptres*) type of the Conqueror to the seventh of Henry I, a period of forty years. The coins of William II and of Henry I are too rare and equivocal to give any indication where (if at all) a break between one moneyer of this name and another may have occurred. All types from William I type IV to William II type II are recorded, those of type VIII being the most numerous of the Exeter coins in Beaworth (57). The doubtful attribution of an example of William II type IV to this moneyer depends on a coin which Carlyon-Britton read as Edwine (BNJ V, pl. IX, 9), a name not otherwise found, but which Brooke thought might be Sewwine. The name on the single coin of the second type of Henry I is also defective, reading apparently (-)EWINE, but perhaps (-)FWINE. The allocation of both to Sewine rests largely on the earlier coins of this moneyer and the existence of a coin in the *BMC* Appendix, No. 39A, also reading (-)EWINE, of the seventh type of Henry I.

The departure of Aelfwine and Seward from the lists in type V (*Two Stars*) is followed in type VI (*Sword*) by the addition of SEMIER or SEMAER, known for three consecutive types of which VIII was represented by 49 examples in Beaworth. No other mint has a moneyer of this name in Norman times.

The only other new moneyer in the Conqueror's reign is LIFWINE, probably a different person from the Lifwine of type I. His coins are of type VIII (*Paxs*) and of types II, IV and V of William II.

One of Lifwine's coins of the *Paxs* type is from an obverse also used by Seward at Barnstaple, and there are two other links between these mints in the same type involving obverses used at Exeter by Semaer. One of

Semaer's dies seems to have been used first at Barnstaple and later at Exeter, and the other first at Exeter. Only three obverse dies of this type are recorded for Barnstaple, and all three of them were thus used also at Exeter.

Only one new moneyer appears in the reign of William II, BRIHTWINE, of whom there is a specimen of type I in Stockholm (Sylloge No. 151) and another of type III in Plymouth Museum (see also Santhill's *Olla Podrida*, ii, 158, and Bergne sale, 1873, lot 318).

The Exeter mint was one of the more important of those on which W. J. Andrew based his extraordinary theory that in the reign of Henry I provincial mints were mainly in private hands and could only coin money when the lord to whom they belonged was in England. Assuming that the city of Exeter belonged to the Earl of Devon (whereas it actually belonged to Queen Maud), Andrew wove an elaborate fabric of fantasy to explain why only five types of the reign were known for the mint. The argument has been decisively demolished by Crump and Johnson.

In addition to the coins of Saewine already mentioned, the only known Exeter issues of Henry I earlier than the last two types of the reign are in the names of a moneyer ending in *-ing*, two of type VII and one of type XII. One of the former, from the 1967 Lummelunda hoard (Stockholm Sylloge No. 267) has the name DUNING and it is on the basis of this coin that the other two may probably be attributed to the same moneyer. The other coin of type VII is in Moscow, part of a find thought to have come from one of the Baltic states, and shows only *-ng* (BNJ XXXVI 1967, p. 88, and pl. III, 6). It has previously been associated with another moneyer known in type XIV, He-ng (Brettell 299), but since Duning is now certainly recorded for this type he must have the stronger claim. The type XII coin, with the name DUNING clear but the mint defective, (-)CE. was attributed in the Drabble sale catalogue (lot 657) to Leicester, *i.e.* (LE)GE, but since there is no other evidence for a moneyer of that name at Leicester, it may more reasonably be assigned to Exeter. An Exeter coin of type XIV in the Brettell collection (No. 298) with traces of a name apparently beginning with D suggests that Duning's activity may have lasted until near the end of the reign. An earlier part of his career might perhaps have been at Totnes, where the name occurs under William II and in the first type of Henry I.

A moneyer found in type XV (BMC 216-7) is HLVD, apparently a foreigner, and a name not otherwise known on English coins. There is an Exeter penny in the British Museum (BMC 126) of the preceding type with a name perhaps ending in *-d*, but the space appears to be rather long for this moneyer.

There are also two pennies of type XV in the British Museum from the Watford find on which the moneyers' names are unclear. BMC 218, with a clear mint signature, has a moneyer -(L?)AWI. On BMC 219 the moneyer's name appears to be -ELHI, with a mint name beginning E(x?). Brettell No. 300, apparently from the same obverse die as BMC 219, confirms the attribution to Exeter and shows the moneyer's name as HE(L?)--. On Brettell No. 301 the moneyer's name could be read as HELHI, and it is

likely that the three coins are of the same moneyer. It is safer not to connect this unusual name with the HE --- NG of type XIV, but the occurrence of these names both beginning HE --- in adjacent types is to be noted.

Only one moneyer seems to span the change of reign. Brettell No. 297 of Henry I's last type has the moneyer's name apparently BRHCDWI (*cf.* BMC 213-5), perhaps BRIHTWI in the light of two coins of Stephen's first type in the British Museum (BMC 32, pl. XLIX, 16, and another), which in combination read *Br --- (t?)wi*. Three other names are found in Stephen type I:

AILRIC, known also in the last type of the reign, is the only Exeter moneyer of type VII (Brettell No. 305), although there is also an Exeter coin of type VII in the British Museum on which the moneyer's name is illegible.

ALGAR, only recorded for Stephen type I; and an incompletely named moneyer, -IER (Brettell No. 308), perhaps (but somewhat improbably) Semier if an old Exeter name is any guide.

As in the Anglo-Saxon period, certain Norman coins have sometimes been erroneously attributed to Exeter on the basis of misread or deceptive mint signatures. A rare variety of the Conqueror's first type without the sceptre, reading MANNA ON EA, is one of these (Lockett 885), although Brooke correctly identified the mint as Canterbury, where this moneyer is known from type I to type V. Another moneyer whose coins have often been assigned to Exeter is Simun in Stephen's reign. These coins are of type I (British Museum from the South Kyme hoard), the very rare type V (Mack 76), and a Civil War variant of type I with a long cross fleury superimposed over the cross moline on the reverse (Mack 178). There seems little reason either to attribute a coin, of similar type to this last, from the Sheldon hoard (Mack 186) to Exeter. Many of these should probably be attributed to Simun of Leicester, but Brettell No. 309 has what appears to be a Canterbury reading.

Before passing to the post-Norman coinages of Exeter, it may be useful to draw together the threads of a theme which runs through much of the comment above on the Anglo-Saxon and Norman moneyers of this mint. In table H are recorded the names of Exeter moneyers which also appear on coins from other mints in Devonshire or adjacent counties. The reasons for thinking that in many of these cases the moneyer involved at more than one mint was the same person may be summarized.

1. The concentration of particular names at several mints in this area cannot be explained by localization of the names themselves. For example, although the relatively common moneyer's name God(a) is found at more mints of the West Country grouping (seven) than in the rest of the country (five), its occurrence elsewhere is widely scattered.
2. When the same name is known at several mints in the area, the type or types known of each often run in a sequence which implies the transfer of activity, sometimes repeated, from one mint to another. The most striking example is Hunewine, but there are many other names (such as those of the Exeter-Totnes-Lydford group under Ethelred) for which a comparable pattern can be observed.

Exeter Moneyer	Cornwall		Devonshire			Somerset									Dorset		Period

Table H – Exeter Moneyers' Names found at other West Country Mints

3. Even when the same moneyer's name (*e.g.* Aelfwine or Goda) is found at more than one mint in each of a series of types, an element of replacement of one mint by another is noticeable.
4. Quite often a pair or group of mints is linked by more than one common moneyer's name at about the same period (*e.g.* Aelfstan, Byrferth, Godwine and Manna; Aelfwine and Goda; or Brihtric and Aelfwine).
5. Die-links have been observed between Exeter and three neighbouring mints—Barnstaple, *Gothaburh* and Ilchester. In the *Paxs* type of the Conqueror each of the three obverse dies used by Seword at Barnstaple was also used at Exeter, and the name Seword occurs on coins of Exeter earlier in the reign.
6. In two cases these die-links connect coins of different mints with the same moneyer's name (Carla and Hunewine), and Hunewin, the Lydford moneyer in the Ilchester die-link, had also struck at Ilchester, although not in the *Pointed Helmet* type.
7. One of the reverse dies of Wulfmaer, a name found in the *Pointed Helmet* of Cnut at both Exeter and Totnes, has the mint name altered from one to the other.

The cumulative inference from these phenomena can only be that it was normal at this period for the responsibility of those who acted as moneyers to be transferable from one mint to another. Evidence of the same thing can be found in other parts of the country, but it is most obviously to be seen in the case of the mints in the extreme south-west, of which the principal one was Exeter.

In 1158 English coinage underwent a long overdue reform. The system of frequent recoinages was abandoned and the number of mints was halved. Very few of Stephen's moneyers were enlisted for the new coinage of Henry II, which is known as the *Cross-and-Crosslets* type from its reverse design or the *Tealby* type from the largest hoard of the period which has come to light. The divisions of this coinage are not marked by clear typological changes, but by variations in the treatment of the bust and inscription.

	A	B	C	D	E-F	Short-cross
Edwid	X		X		Not Known	
Guncelin	B		?			
Ricard	X					X
Rogier	B			X		X
Rainir		X	X			

Table J – Exeter Moneyers 1158-1180

Of the three south-western mints, Exeter was probably larger than Ilchester, and certainly than Launceston, where only one pair of dies is known in Class A and coinage was very short-lived. It is possible that Barnstaple should also be regarded as a mint of this coinage, but if so only one coin is known which could be attributed to it (BMC 1a). Exeter had five moneyers in all, of whom four, namely Edwid, Guncelin, Ricard and Rogier, are known to have struck the earliest class (A) of the new coinage, which is dated 1158-61. Classes B and C, which appear to have run concurrently between 1161 and 1165, include the latest coins of Edwid and (?) Guncelin and those of a new moneyer, Rainir. Ricard and Rogier are both names on the new coinage of 1180, but the only Tealby class later than A known to have been struck by either is class D (1165-8) of Rogier. Details of the known varieties of each moneyer are given in the British Museum Catalogue.

A Ricard FitzEstrange, moneyer of Exeter, is mentioned in the Pipe Rolls in 1157-8 under Devonshire as owing 100 marks in circumstances which elsewhere normally refer to outgoing moneyers, but the name is not known under Stephen. Ailric, who is, had to pay off his debt over five years from 1158 to 1163. Very few moneyers of the Tealby coinage, and none of those at Exeter, had been in office under Stephen.

Exeter coins of the *Cross-and-Crosslets* type, like those of other West Country mints, are rare, partly because of the lack of hoards from the West of England. No Exeter coins are known of the later classes, E and F (1168-80); only one moneyer of Ilchester is known in either of these classes.

One irregular pair of dies used at Exeter may be of unofficial manufacture. It has affinities with classes B and C in the bust, but has an inner circle on the obverse, and the unusual reading REX S (*Secundus*, or *Senior*?). The moneyer's name is illegible, and the mint name begins XSE... This reverse die is also paired with a regular class B obverse used by Rainir. A REX S obverse with a somewhat similar bust is also known of the Ilchester moneyer Ricard.

In Henry II's second reform of the coinage in 1180, when a short voided cross was introduced on the reverse, Exeter had both a mint and an exchange. Its moneyers are named in Table K. The first class is divided into three: *a*, rare early coins with square E or C, as in the Tealby period; *b*, the main type of the recoinage in which eleven mints participated; and *c*, a rougher version of *b*, before the introduction of which many of the recoinage moneyers had ceased to strike. Of the six class I Exeter moneyers, three struck coins with one or both dies of Ia, showing that the Exeter mint was active at a very early stage in the recoinage. Examples of all varieties in Table K are in the British Museum, with the exception of class Ia of Osber, which is recorded by Lawrence. One reverse die of Ricard shows square letters in the mint name (Brettell No. 327), and although the coins struck from it might be described as Ib/Ia, it seems that EXEC may have been cut over LVND on a normal Ib reverse die to correct an error (there was no moneyer Ricard at London in this class).

Only Ricard is known for class Ic (Brettell No. 331), and the same moneyer provides the only evidence that coins (class III) were struck at

	Tealby	Short Cross										Vc-VIII	Long Cross

Walter											X	B				

Table K – Exeter Moneyers, 1180 to 1250

Exeter in Richard I's reign, 1189-99. The mint was, however, reactivated for John's recoinage of 1205, when Ricard was joined by two new moneyers, Gileberd and Iohan. These three are all known for both Va and Vb, but not for Vc, when several of the sixteen mints of the recoinage were already closed. Like Ia in 1180, Va in 1205 (with reversed S and a cross pommety as the mint-mark) was a short-lived early variety.

Exeter also figures in Henry III's recoinage of 1247-50 when the short voided cross was replaced by a long cross on the reverse. The earliest coins of the new type were issued only by the mints previously active at London, Canterbury and Bury St. Edmunds, but a new type was soon introduced (1248) reading HENRICUS REX TERCI(US) and these coins (class II) were issued by an additional eight mints, including Exeter. A further eight mints were added during class III (1248-50), the coins of which read REX III. The Exchequer Records include a list of all the mint officials involved for the long cross recoinage and each provincial mint was allotted four moneyers. The names at Exeter are—Robertus Picon, Phillipus Tinctor, Johannes de Egestone and Walterus Okestone. Coins of all these moneyers are known of both classes II and III and all are represented in the Brettell collection except class II of Walter. There are three varieties of class III: *a*, with a long face like that of class II; *b*, with a round face; and *c*, with a pronounced neck. From 1250 onwards all the provincial recoinage mints, including Exeter, were closed.

Exeter was not amongst the nine mints of Edward I's recoinage of 1280, when moneyers' names disappeared from the reverse. The nearest mint to the south-west on this occasion was Bristol. But in 1300, when the import of foreign counterfeits had necessitated a further recoinage of much of the currency then in circulation, Exeter was again included. Its coins, which are all of Fox class IXb, read CIVITAS EXONIE. The records of this well documented coinage show that the Exeter mint accounts run from June 12th to December 31st and that £3,757 was struck there, a total of nearly a million pennies.

The issue of 1300 was the last occasion on which a mint at Exeter was active in the middle ages. Subsequent recoinages did not involve an extensive network of mints, although Bristol was re-opened by Edward IV and Henry VIII.

The next occurrence of a mint at Exeter was in the Civil War. From 1642, the king's main mints were at York and Oxford, but there were large tracts of Royalist country cut off from these centres. An important one was in the far West, and in November 1642 Charles commissioned Sir Richard Vyvyan to set up a mint to finance the Royalist cause in Cornwall and Devon, and 'to coyne or cause to be coyned at such places as you shall thinke fitting all such Bullion or plate of gold or silver, as shalbe delivered unto you by any of our subjects for our use'. Bodmin and Liskeard were suggested, but the accounts of the Royal Customs at Fowey contain an item for delivery "a truncke of the Lord Roberts his plate to Trewrow to the Mynt from Liskeard".

Early in September 1643 Exeter was taken by the Royalists and Vyvyan lost no time in setting up his mint there. It was officially authorized by

Charles in a commission of January 3rd, 1644, but Vyvyan's account books date back to September 27th. The Exeter mint was active on a considerable scale until the city fell to Fairfax in April 1646.

There is some difficulty in apportioning Vyvyan's coins between the mints of Truro and Exeter. The series is distinctive in using the royal arms as the reverse type instead of the Declaration of Wellington which characterized the Royalist coinage from 1642. Most of Vyvyan's coins bear the rose mint-mark, the badge of West Country silver, but some have a tower or EX. The denominations include a gold pound, and the crown, halfcrown, shilling, sixpence, groat, threepence, halfgroat and penny in silver. There is also a double-weight striking from crown dies, presumably intended as a ten-shilling piece.

Most of the dated coins are of 1644 and 1645, and belong to Exeter, but there are some halfcrowns dated 1642 which must have been struck at Truro. Most of the coinage of Truro was undated, but since many Exeter coins are also without date, division between the two cannot be established. One distinctive obverse die for the halfcrown is combined with reverses bearing the dates 1642, 1644 and 1645, which suggests that in other cases, too, dies may have been moved from Truro to Exeter and continued in use.

Other mints were in operation in the West Country after the loss of Bristol in 1645, when Bushell is thought to have set up a mint on Lundy Island, or in North Devon. Some of these coins are listed in this catalogue, together with others of fine workmanship which have been supposed to have been struck at Combe Martin, which had lead mines nearby. The identity of the Royalist mints in this area in the later years of the war is, however, largely a matter for speculation.

Copper tokens were issued by Exeter tradesmen in the 1650's and 1660's, as elsewhere throughout England, to remedy the deficiency of small change. But the local copper token currency at the end of the eighteenth century was issued from the centres of the Industrial Revolution. The last occasion, therefore, on which Exeter figures in English monetary history was when the mint was revived in 1695, along with Bristol, Chester, Norwich and York, to assist in the great recoinage of hammered silver. It was the last occasion on which English country mints were opened for that purpose. The dies were sent from London and belong to the normal types of the period, with the addition of the mint initial below the bust. Though the Tower mint continued the recoinage into 1699, it was possible to close down the outlying mints during the summer of 1698. None of their coins, however, bears a date other than 1696 or 1697. The denominations struck out of London were the halfcrown, shilling and sixpence. Exeter halfcrowns of both dates are rare. On the shillings, the first bust is found in 1696 and 1697, and the third in 1697. The same varieties occur for the sixpence, but there is also a mule, of which the Brettell specimen may be unique, with a third bust obverse but dated 1696. The Exeter mint coined 147,296 lbs. of silver, or the best part of half a million pounds sterling, and perhaps somewhat surprisingly exceeded the output of any of the other four; Exeter and Bristol together struck more than half of the total issue of the country mints, an indication maybe of where most of the hammered currency in the country was concentrated.

In preparing this introduction I have drawn extensively on published material relevant to the subject and would also like to express my indebtedness to Mr. Blunt, Mr. Dolley, Mr. Elmore Jones, Mr. Lyon, Mr. Mitchell, Dr. Rasmusson, Mr. Seaby and Miss van der Meer for their response to my requests for information. The works consulted are listed below.

Aethelred II (978-1016)

The types of this reign, with their classification according to Hildebrand, and the examples represented in the Brettell collection, are as follows:—

Type	Hildebrand	Brettell Nos.
First Small Cross	A	Not represented
Hand—First Hand	B <sub>1</sub>	13, 14, 20, 21, 24, 71-73, 87, 88, 105, 106
Second Hand	B <sub>2</sub>	4, 25-27, 84, 86, 89-93
(Benediction Hand)	(B <sub>3</sub> )	True type not known for the mint
Mule Benediction/Crux	Cd	68
Crux	C	5, 6, 15-18, 22, 28, 29, 58-60, 69-70, 74, 75, 85, 94-97, 107-110
Small Crux	Ca	44
(Intermediate Small Cross)	(A)	True type not known for the mint
Mule Int. Small Cross/Crux	Cb	61, 62, 125
Long Cross	D	7, 8, 23, 36, 37, 47-53, 63-65, 67, 98-102, 111-115, 122, 126-132
Helmet	E	3, 9, 11, 12, 38-40, 45-46, 66, 116-119, 123, 124
Last Small Cross	A	10, 19, 30-35, 41-43, 54-57, 76-83, 103, 104, 120, 121

- 5 0 0 406 Sixpence, 1697 E, 1st bust, small crowns (ESC 1560). *Almost very fine.*

END OF SALE

## COIN CATALOGUES

On the average we issue twelve or more Coin Catalogues each year, some of which are usually of sales of important collections.

### CATALOGUE SUBSCRIPTIONS

PRE-SALE CATALOGUES, frequently illustrated, are normally posted to subscribers about three weeks prior to the date of Sale.

PRICED CATALOGUES (not illustrated) are issued after each Sale with the prices realised printed in the margin opposite each Lot, thus giving at a glance a reliable guide to values. The final test of value must always be auction prices rather than the figures given in books of reference, for changing times and fashions soon render the latter obsolete and misleading.

The Priced Catalogues are posted to subscribers as soon as ready, usually about three weeks after the date of Sale.

### Subscription Rates

*(commencing from 1st January)*

Pre-Sale Coin Catalogues	.....	20s. 0d. per annum
Priced	„ „ .....	40s. 0d. „ „

(Reductions for new subscribers commencing after 1st April.)

All subscriptions expire on 31st December, and renewal reminders are issued. Catalogues of past Sales cannot be supplied.

### AIR MAIL

To allow subscribers resident outside Europe time to submit postal bids, Pre-Sale Catalogues will, if desired, be sent by Air Mail. Air Mail postage is not, however, included in the Subscription Rate and must be borne by the subscriber. In such cases an additional £2 should be sent as a deposit and we will advise when this is exhausted.
